

Cross-Closter Trail System

The Cross-Closter Trail System links old and new pathways to form one continuous walkway through the borough - from Demarest to Norwood. The trails can be entered at many points and so may be enjoyed in sections or in its entirety. You can explore several different natural habitats including riparian zones and forested wetlands - all a part of the greater Hackensack Watershed. The Tenakill Brook is one of the few north-flowing streams in the northern hemisphere. The Tenakill and other streams in this area are classified as C1 streams - sources of fresh drinking water. These resources and the environs around them deserve our protection and stewardship.

- Basic rules:**
- Dogs must be on a leash. Please clean up after your dog.
 - No motorized vehicles.
 - For your health and safety, don't be on the trails after dark. Be alert for ticks and poison ivy.
 - Please respect the privacy of adjacent properties.
 - When a game is in play at Tenakill School, please use Storig Avenue.
 - Trails close after dark.
 - Enjoy the space, leave no trace.

Funding for this project was provided by the Borough of Closter and the New Jersey Department of Environmental Protection.
